

Anti-shake "core" algorithm Super-powered motor powerfully drives hundreds of device

The new iterative W5 anti-shake algorithm combining with high-precision brushless motor with low power consumption and large torque, the ultra-high load capacity for mobile phone with stronger anti-shake stability, and the 1/4-inch threaded port enable it to be easily compatible with and driving the field of vision of many "customers who like making changes".

"Exquisite eye" makes the device clear at a glance

Low-power OLED screen displays the parameters of gimbal and camera, the current operating mode, the battery level, and the Bluetooth connection, etc.

SPG 2

Capture Your Dancing Melody

- Aviation aluminum materials
- Bluetooth dual channel
Sound expansion interface
- 360° rotation follow mode
- Splash proof

Parameters

Product Name	SPG 2 3-Axis Stabilized Handheld Gimbal for Smartphone
Max. Tilting Range	320°
Max. Rolling Range	320°
Max. Panning Range	360°
Tilting speed	2°/s ~ 75°/s
Panning speed	3°/s ~ 150°/s
Usage time in theory	14 hours
Load weight	300g
Weight	440g (Not including smartphone and the battery)
Compatible for Reference	iPhone series smartphone and Android series smartphone (The width between 54 mm and 95 mm)

SPG 2

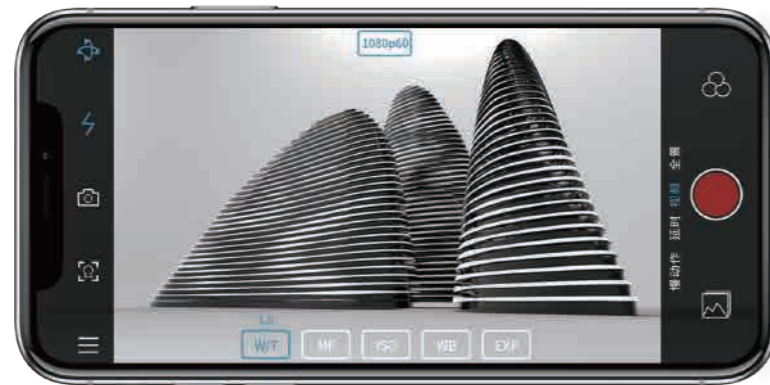

Capture Your Dancing Melody

Exquisite craftsmanship, extraordinary quality

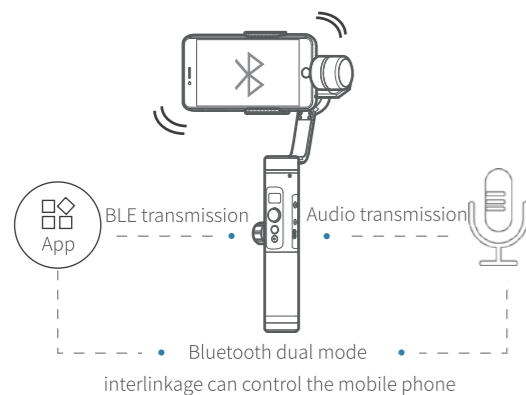

Aviation aluminum alloy makes lightweight, sturdy and durable body.
Metal sand blasting technology combining with skin-like material creates an extraordinary comfortable grip for the hand bar.

Exclusive app meets your more detailed needs

- Function parameters
- Zoom speed
- Face follow
- Object tracking
- Slow motion shooting
- Panorama shooting
- Follow focus control
- Time-lapse photography

Bluetooth dual-mode enables the mobile phone audio interface to regain new voice

Data and audio Bluetooth dual channel connection not only provides data channels for gimbal and mobile phone, but also provides audio expansion interface for external audio receiving equipment.

Unique multi-function "magic ring" brings unlimited possibilities

By connecting the Vicool App, you can use the magic ring to manually control the focus and zoom of the phone, and precisely adjust the rotation of panning, rolling and tilting motors.

Exclusive trigger button brings self-willed creation in "hunting shadow" mode

After the Hunting Shadow mode is activated, the gimbal will quickly enter the lock and reset state, and quickly capture each moment, truly realize "obtaining what you turn towards".

Splash proof

The whole device is made of water-repellent technology to achieve splash-proof and dust-proof performance, so you can enjoy yourself to the full on a rainy day.

Two-way power supply, 14 hours of battery life

The body comes with an output jack to charge the mobile phone, and supports the power bank to charge the large capacity battery and combine with the low-consumption motor to provide 14 hours of long battery life.

Three-axes follow-space mode enables you to feel the beauty of weightless images

SPG2 super-torque motors combine with the intelligent anti-shake algorithm, even in the extreme environment that the sky and earth are spinning round, the three axes can accurately follow the intricate angle to shoot the shocking image with special effects SPG2.

Easily switch between horizontal and vertical shooting

Tik Tok / Live / Vlog
